

The SPY III

The Spy III is an easy to use, portable alarm system that interfaces with existing customer radio systems for use in a variety of applications including stakeouts, construction site theft (ie...copper wire), domestic violence, robberies and more. The Spy III provides a cost effective security solution for a wide variety of corporate, commercial, law enforcement and public safety applications.

TECHNICAL SPECIFICATIONS

The SPY III supports multiple sensors on two zones.

User recorded alarm messages are broadcast over radio.

One zone can be configured as a local speaker message.

Re-record your messages in seconds using front panel keypad.

Easy to read display.

Uses a variety of wireless sensors including motion, door, panic, tilt, glassbreak, billtrap, general purpose and others.

Rechargeable gel-cell battery provides up to one week of battery life. System can be plugged into AC power to maintain continual battery charge.

Compatible with VHF, UHF, 800 and 900 Mhz radios, and virtually all models of digital trunking radio systems.

Radio range depends on current communication system. Sensor range depends on environment.
